

Product Information

Solaris™ Dome Range

Product Re-Brand

No: **PN/FV007**

Doc date: **10.11.2006**

Product Transfer:

Further to the acquisition of Bewator Limited by Siemens Building Technologies and our commitment to continual product improvement, the whole Solaris™ Dome range (product and accessories) has been integrated into the Siemens CCTV portfolio.

Essentially the Siemens Solaris™ product is technically identical to the Bewator version it is replacing, with the following, customer focused, changes.

Brief details of product change:

The product branding has now been changed. Solaris™ is now part of the Siemens portfolio and is therefore branded as such.

The product documentation, which is included with the product, on a CD, is translated into ten languages (English, German, Dutch, Spanish, Italian, French, Polish, Swedish, Czech & Portuguese). Printed quick start guides (10 languages) are also included with the product.

An additional protocol, CCDA has been included to fully integrate the Solaris™ product into the Siemens CCTV environment.

Product Information

The part numbering for all components has been changed to comply with Siemens branding. A simple cross-reference chart is shown below

Old Part Number	New Part Number	Description	Image
